Faris Halilovic

Senior Web Developer

Summary

Seasoned and passionate Web Developer in designing and implementing dynamic websites and applications. Expert in both front-end and back-end development, specializing in responsive design and performance optimization. Proficient in modern technologies such as HTML5, CSS3, Typescript, JavaScript, PHP and javascript modern frameworks such as Vue, React, Angular, Node.js, and databases like MongoDB and SQL. As a long-time, I have been working on front-end development as team member & freelancer and have high skills in transforming complex design requirements into intuitive interfaces. I have been playing a central role in the development and maintenance of responsive web projects in various remote teams using javascript frameworks like vue, react and angular, etc. My portfolio showcases a range of projects that highlight not just my technical abilities but also my commitment to building responsive and accessible websites. I have strong communication and collaboration skills, and a desire to work as part of a team committed to a common goal.
